PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience working with SQL, Power BI, Snowflake, Tableau, Python, and Databricks to build reporting solutions, dashboards, and analytics workflows. Experienced in developing interactive dashboards, writing optimized SQL queries, supporting ETL processes, and analyzing large datasets to deliver actionable business insights. Skilled in KPI reporting, dashboard automation, data transformation, trend analysis, and collaborating with business teams to improve reporting efficiency and decision-making.

TECHNICAL SKILLS

Languages: SQL (Joins, CTEs, Window Functions), Python (Pandas, NumPy), R

BI & Visualization: Power BI (DAX, Power Query), Tableau, Excel

Databases & Warehousing: Databricks, Snowflake, PostgreSQL, Data Modelling, Data Warehousing

Data Engineering: ETL Pipelines, API Integration, Data Transformation, Data Validation, Data Cleaning

Analytics: KPI Tracking & Reporting, EDA, Regression, Classification, Clustering, Statistical Analysis, Trend Analysis, Customer Segmentation

Tools: Jira, Agile, Git

WORK EXPERIENCE

Data Analyst

BCBS FL

Fairfax, VA

Nov 2023 - present

- Developed and maintained SQL queries, stored procedures, and reporting solutions using Snowflake and SQL Server for business reporting needs.
- Built interactive Power BI dashboards and paginated reports to track KPIs, operational metrics, and business trends for leadership teams.
- Used Power Query and DAX to clean, transform, and model data from multiple enterprise data sources.
- Improved report performance by optimizing SQL queries and shifting heavy calculations into backend SQL processes.
- Assisted with ETL workflows and reporting automation using SQL-based data pipelines and reporting tools.
- Worked closely with business users and cross-functional teams to gather reporting requirements and validate reporting data.
- Supported migration of reports from SSRS, Tableau, and Crystal Reports into Power BI dashboards.
- Created drill-through reports, executive scorecards, and recurring business reports to support operational and strategic reporting needs.
- Collaborated with ETL teams to validate data pipelines and improve reporting workflows and accessibility.

Associate Software Engineer – Data & Performance Analyst

Bosch Global Software Technologies

Hyderabad, India

Aug 2022 - Aug 2023

- Analyzed large-scale automotive testing datasets across powertrain and chassis systems to identify quality risks, anomaly trends, and performance issues.
- Conducted root cause analysis to minimize recurring defects and improve system reliability within HIL testing environments.
- Utilized SQL and Python to process, validate, transform, and analyze structured and unstructured test data.
- Identified defect patterns and recurring system behavior trends, delivering detailed analytical reports to engineering and testing teams.
- Partnered with cross-functional stakeholders to support data-driven improvements in testing operations, operational reporting, and product quality.
- Supported performance analysis initiatives by identifying reliability insights and improving reporting processes across testing workflows.

Junior Data Analyst

Airtel

Hyderabad, India

Mar 2021 - Jun 2022

- Developed Power BI dashboards and reporting solutions to analyze customer behavior, revenue trends, and operational performance metrics.
- Wrote SQL queries, joins, stored procedures, views, and triggers to support reporting and business analysis.
- Assisted in migrating legacy reports and Crystal Reports into Power BI reporting environments.
- Built and scheduled recurring daily, weekly, monthly, and yearly reports for operational and business teams.
- Participated in ETL support activities, report analysis, technical documentation, and reporting enhancement initiatives.
- Collaborated with business stakeholders to gather requirements and deliver dashboards supporting data-driven decision-making.

PROJECTS

Sales Performance Dashboard (Power BI – Adventure Works)

- Designed and developed an interactive Power BI dashboard analyzing 50K+ sales records to monitor revenue, profitability, orders, returns, and KPI reporting metrics.
- Tracked \$24.9M in revenue and \$10.5M in profit through advanced dashboard visualizations, business intelligence reporting, and interactive KPI dashboards.
- Built DAX measures, drill-through reports, and automated dashboards to improve reporting efficiency, business visibility, and operational monitoring.
- Identified top-performing product categories contributing 65%+ of total orders and revenue through exploratory data analysis and trend analysis..

Customer & Revenue Analytics Dashboard (Power BI – Maven Market)

- Developed a customer intelligence dashboard analyzing 17K+ customer records to evaluate revenue performance, customer behavior, and purchasing patterns.
- Performed customer segmentation analysis based on demographic and purchasing behavior to identify high-value and high-retention customer groups.
- Built KPI dashboards for revenue, profit, and sales target tracking to support strategic business decision-making and performance optimization.
- Identified top-performing customers contributing a significant share of total revenue through customer analytics and statistical analysis.

SQL Data Analysis Project

- Conducted advanced data analysis using joins, CTEs, aggregations, and window functions across large-scale datasets.
- Performed cohort analysis and trend analysis to evaluate customer retention, behavioral patterns, and revenue performance.
- Optimized complex SQL queries to improve reporting efficiency, scalability, and overall data processing performance.
- Identified key revenue trends and customer insights to support data-driven business decisions and reporting automation.

EDUCATION

George Mason University, Fairfax, VA

Master of Science in Data Analytics Engineering

GITAM University, India

Bachelor of Technology in Computer Science

CERTIFICATIONS

- Google Data Analytics
- Microsoft Power BI Desktop
