PROFESSIONAL SUMMARY

Data Analyst with hands-on experience working with SQL, Python, Snowflake, and Power BI to turn raw data into meaningful insights. I've worked on building ETL pipelines, dashboards, and KPI tracking systems that help teams make better decisions. I enjoy digging into data, finding patterns, and simplifying complex problems into clear, actionable insights. Comfortable working in Agile teams and collaborating with stakeholders to deliver impactful analytics solutions.

EDUCATION

George Mason University — **Fairfax, Virginia**
Master of Science in Data Analytics Engineering — August 2023- May 2025

GITAM University — **Hyderabad, India**
Bachelor's in computer science and engineering — June 2018- April 2022

WORK EXPERIENCE

Data Analyst – Client Analytics Project: Pearmund Winery Cellars — **Fairfax, Virginia**
January 2025 – May 2025

- Worked with 50K+ sales records to understand trends in revenue, pricing, and customer behavior.
- Built automated ETL pipelines using Python and APIs, cutting down manual reporting time by 40%.
- Used SQL (joins, aggregations, window functions) to explore data and uncover insights.
- Created interactive Power BI dashboards to monitor performance and support real-time decision-making.
- Translated business requirements into scalable dashboards and reporting solutions.
- Performed data transformation, validation, and troubleshooting to ensure high data accuracy and reliability.
- Collaborated with stakeholders to refine requirements and enhance dashboard usability.

Associate Software Engineer – Data & Performance Analyst — **Hyderabad, India**
BOSCH Global Software Technologies — August 2022 – August 2023

- Analyzed automotive test data to identify performance issues and quality risks.
- Performed root cause analysis to help improve system reliability.
- Used SQL and Python to clean and process large datasets for reporting.
- Translated technical test results into clear reports and dashboards for engineering teams.
- Worked on HIL testing and identified recurring failure patterns.
- Collaborated in Agile teams using Jira to track tasks and support releases.

PROJECTS

AUDI and Porsche - HCP1(PowerTrain and Chassis) — **August 2022 – August 2023**

- Explored system testing data to identify defects and performance issues.
- Used SQL and Python to find trends and anomalies in large datasets.
- Applied basic statistical techniques to evaluate system performance.
- Built structured reports to summarize key insights

TECHNICAL SKILLS

Programming & Query Languages: SQL, Python (pandas, NumPy), R
Data Visualization & BI: Tableau, Power BI, DAX, Power Query, Excel(Pivot Tables, Advanced Functions)
Data Engineering & ETL: API extraction, ETL pipelines, data transformation
Analytics & Statistics: EDA, regression, classification, clustering, Statistical Analysis, Familiarity with SAS-based statistical workflows
Soft Skills: Communication, Documentation

CERTIFICATIONS

Google Data Analytics
Data Visualization
Microsoft Power BI Desktop
