PROFESSIONAL SUMMARY

Data Analyst with experience in building Power BI dashboards, developing ETL pipelines, and performing advanced data analysis using SQL and Snowflake. Skilled in designing data models, KPI frameworks, and interactive reporting solutions. Experienced in Agile environments using Jira and collaborating with stakeholders to deliver scalable analytics and reporting solutions.

EDUCATION

George Mason University **Fairfax, Virginia**
Master of Science in Data Analytics Engineering August 2023- May 2025
Relevant Courses: Data Mining for Business, Data Visualization, Statistical Analysis, Cloud Computing

GITAM University **Hyderabad, India**
Bachelor's in computer science and engineering June 2018- April 2022

WORK EXPERIENCE

Data Analyst – Client Analytics Project: Pearmund Winery Cellars **Fairfax, Virginia**
January 2025 – May 2025

- Analyzed 50K+ transaction-level sales records to identify trends in revenue, pricing, and customer behavior.
- Built automated Python-based ETL pipelines integrating API data sources, reducing manual reporting time by 40%.
- Designed structured datasets and KPI frameworks tracking revenue growth, retention, AOV, and conversion metrics.
- Designed, deployed, and published interactive Power BI dashboards using DAX and Power Query, enabling real-time business insights and self-service reporting for stakeholders.
- Implemented validation checks to ensure reporting accuracy and data integrity.
- Assisted in standardizing reporting logic and documentation to support cross-team consistency and best practices.
- Collaborated with business stakeholders to gather requirements, troubleshoot reporting issues, and improve dashboard usability and adoption.

Associate Software Engineer – Data & Performance Analyst **Hyderabad, India**
BOSCH Global Software Technologies August 2022 – August 2023

- Analyzed large volumes of automotive system test data to identify trends, anomalies, and quality risks.
- Conducted root-cause and trend analysis to improve release readiness and defect resolution.
- Reviewed MISRA compliance findings and translated technical metrics into structured reports for engineering teams.
- Performed HIL testing and evaluated performance results to detect recurring failure patterns.
- Worked in Agile environments using Jira to track issues, manage workflows, and support release cycles.

PROJECTS

AUDI and Porsche - HCP1(PowerTrain and Chassis) **August 2022 – August 2023**

- Performed exploratory and statistical analysis on integration and testing datasets.
- Identified recurring defect patterns and performance issues through trend analysis.
- Generated structured reports summarizing key metrics and system performance indicators.

TECHNICAL SKILLS

Programming & Query Languages: SQL, Python (pandas, NumPy), R
Data Visualization & BI: Tableau, Power BI, DAX, Power Query, Excel(Pivot Tables, Advanced Functions)
Data Engineering & ETL: API extraction, ETL pipelines, data transformation
Analytics & Statistics: EDA, regression, classification, clustering, Statistical Analysis, Familiarity with SAS-based statistical workflows
Soft Skills: Communication, Documentation

CERTIFICATIONS

Google Data Analytics
Data Visualization
Microsoft Power BI Desktop
